Atlas Get-to-Know-You Question Bank

A collection of friendly, conversational questions that help Atlas learn how each student thinks, learns, and grows — so it can recommend the university programmes that truly fit them. Every question has four answer options (A, B, C, D), each reflecting a different but equally valid way of thinking or working. There are no right or wrong answers.

1. Learning Preferences

1. When you're trying to understand a new topic, what helps you most? A. Watching a video or seeing pictures and diagrams B. Listening to someone explain it out loud C. Reading through notes or a textbook D. Trying it out yourself, hands-on
2. If your teacher gives you a new concept, you'd rather they: A. Draw it on the board B. Talk you through it step by step C. Give you a handout to read D. Let you experiment with it first
3. When you study for a test, you usually: A. Make colourful charts or mind maps B. Explain the topic out loud to yourself or a friend C. Read your notes over and over D. Do practice questions until it clicks
4. Which classroom activity sounds most enjoyable to you? A. A demonstration or a video B. A class discussion C. Independent reading D. A hands-on experiment or project
5. You remember things best when you: A. See them written or drawn out B. Hear them explained C. Write them down yourself D. Do them physically
6. When learning a new skill, like cooking or a sport, you prefer to: A. Watch someone else do it first B. Have someone talk you through each step C. Read the instructions carefully D. Just start trying and learn as you go
7. In group study sessions, you tend to: A. Draw diagrams to explain things to others B. Talk through ideas with the group C. Take detailed notes D. Suggest practical examples or exercises
8. If you had to learn about the solar system, you'd enjoy this the most: A. Looking at pictures and models of the planets B. Listening to a podcast about space C. Reading a book about astronomy D. Building a model of the solar system
9. When your teacher assigns homework, you prefer it to include: A. Charts, images, or videos to review B. A chance to discuss it with classmates C. Reading passages to work through D. A real task or problem to solve
10. Which of these would help you learn a new language fastest? A. Flashcards with pictures B. Conversation practice with a speaker C. Grammar books and reading D. Actually travelling or living where it's spoken

11. When you're confused about something, your first instinct is to: A. Look for a diagram or video that explains it B. Ask someone to explain it to you C. Search for a written explanation D. Try to work it out by doing something practical
12. You enjoy classes more when the teacher: A. Uses lots of visuals and slides B. Encourages discussion and questions C. Gives clear written material D. Includes practical, real-life activities
13. When revising, which tool do you reach for most? A. Highlighters and coloured pens B. A study partner to quiz you C. A quiet space with your notes D. Past questions and sample problems
14. If you could choose how a lesson is taught, you'd pick: A. A short documentary or animation B. A lively class debate C. A well-written textbook chapter D. A field trip or lab session
15. You find it easiest to follow instructions when they are: A. Shown as pictures or a flowchart B. Explained to you verbally C. Written down step by step D. Demonstrated in front of you so you can copy along
16. When trying to memorise facts, you like to: A. Turn them into a picture or diagram in your mind B. Say them out loud repeatedly C. Write them down several times D. Connect them to something you've physically experienced
17. In a science class, you enjoy this part the most: A. Watching a demonstration B. Discussing the results as a class C. Reading about the theory D. Doing the experiment yourself
18. If you had to give a class presentation, you would rely most on: A. Slides with images and diagrams B. Your speaking and explaining skills C. Detailed notes or a script D. A live demonstration or sample
19. When learning history, you prefer to: A. Look at timelines, maps, and pictures B. Listen to stories or documentaries C. Read books or articles about it D. Visit a museum or re-enact events
20. Your ideal way to learn maths is: A. Seeing worked examples with diagrams B. Having someone talk through the steps C. Reading through solved problems D. Solving many problems yourself
21. When a teacher uses an analogy to explain something, you: A. Picture it clearly in your head B. Repeat it back in your own words C. Write it down to remember it D. Try to find a real example of it yourself
22. Which environment helps you focus and learn best? A. One with posters, colours, and visual aids B. One where people can talk and share ideas C. A quiet room with just your books D. A space where you can move around and try things
23. When you finish reading a chapter, you like to check your understanding by: A. Drawing a summary diagram B. Explaining it to someone else C. Rewriting the key points D. Answering practice questions on it
24. If a subject feels hard, what usually helps you get through it? A. Finding videos that simplify it B. Talking to a friend or teacher about it C. Reading more resources on it D. Practising more examples

25. You'd say your learning style is best described as: A. Visual — you like to see it B. Auditory — you like to hear it C. Reading and writing — you like to read and note it D. Kinesthetic — you like to do it

2. Study Habits

26. When do you usually get your best studying done? A. Early morning before school B. Right after school in the afternoon C. In the evening after dinner D. Late at night
27. How do you usually plan your study time? A. I follow a fixed timetable B. I study whenever I feel motivated C. I study based on upcoming deadlines D. I study a little bit every day, no strict plan
28. When studying, you prefer to: A. Focus on one subject for a long stretch B. Switch between subjects every so often C. Study in short, timed bursts with breaks D. Study different topics depending on your mood
29. Where do you usually prefer to study? A. In your room, alone B. In a library or quiet public space C. With friends or classmates D. Anywhere, as long as you have your materials
30. Before an exam, your approach is usually to: A. Start revising weeks in advance B. Revise steadily over the final week C. Do a big push a few days before D. Cram the night before
31. When you don't understand something while studying, you: A. Skip it and come back later B. Ask someone immediately C. Look it up online or in a book D. Keep trying until it makes sense
32. How do you keep track of your assignments and deadlines? A. A written planner or diary B. Reminders on my phone C. I just remember them D. My teachers or parents remind me
33. When studying a difficult subject, you tend to: A. Break it into small, manageable parts B. Push through it all at once C. Study it together with a friend D. Leave it for last and hope for the best
34. What usually distracts you most while studying? A. My phone and social media B. Noise around me C. Daydreaming or losing focus D. Feeling tired or sleepy
35. How often do you review what you learned in class that same day? A. Every day, without fail B. A few times a week C. Only before a test D. Rarely, I rely on the class itself
36. When taking notes in class, you prefer to: A. Write everything the teacher says B. Summarise the main points only C. Draw diagrams and mind maps D. Type or record instead of writing by hand
37. Do you prefer studying with background music or silence? A. Music helps me focus B. Silence helps me focus best C. It depends on the subject D. I don't really notice either way

38. When facing a big project, you usually: A. Start immediately and work steadily B. Plan it out first, then begin C. Wait until closer to the deadline D. Work in bursts of energy whenever inspired
39. How do you feel about study groups? A. I love them, I learn a lot from others B. I like them occasionally C. I prefer to study alone D. It depends on who is in the group
40. When you get a low grade on a test, your next step is usually to: A. Go over your mistakes carefully B. Ask the teacher for help C. Study harder for the next one D. Move on without dwelling on it
41. What motivates you to keep a consistent study routine? A. Wanting good grades B. Fear of falling behind C. Enjoying the subject itself D. Encouragement from family or friends
42. How do you usually handle multiple assignments due at the same time? A. Prioritise by deadline B. Prioritise by how hard each one is C. Do a bit of each every day D. Focus on one at a time until it's done
43. When you sit down to study, how long can you usually focus before needing a break? A. Less than 20 minutes B. About 30 to 45 minutes C. About an hour D. I can go for hours without a break
44. Do you prefer studying with a strict schedule or a flexible one? A. Strict — I like structure B. Mostly structured, with some flexibility C. Mostly flexible D. Completely flexible, no set schedule
45. When revising for exams, you find it most helpful to: A. Create summary notes B. Test yourself with practice questions C. Teach the material to someone else D. Re-read your notes and textbook
46. How do you usually react when you fall behind in a subject? A. Make a plan to catch up quickly B. Ask a teacher or tutor for extra help C. Try to catch up gradually on your own D. Feel stressed but push through anyway
47. What role does sleep play in your study routine? A. I prioritise sleep over late-night studying B. I sometimes sacrifice sleep to study more C. I often stay up late studying D. My sleep isn't really connected to my study habits
48. When choosing what to study first, you usually pick: A. The hardest subject, to get it out of the way B. The easiest subject, to build momentum C. Whatever is due soonest D. Whatever interests you most that day
49. How do you feel about using apps or tools to help you study? A. I use several study apps regularly B. I use one or two occasionally C. I prefer traditional books and notebooks D. I haven't really tried study apps
50. At the end of a study session, you usually: A. Review what you covered B. Plan what to study next C. Just stop and relax D. Check if you understood everything

3. Problem-Solving Style

51. When you face a difficult problem, your first step is usually to: A. Break it down into smaller parts B. Think about similar problems you've solved before C. Ask someone else for their opinion D. Just try different solutions until one works
52. When solving a maths problem, you prefer to: A. Follow a clear, step-by-step method B. Look for patterns and shortcuts C. Talk it through with a classmate D. Try a few approaches until you find one that fits
53. If a plan doesn't work, what do you usually do? A. Analyse what went wrong first B. Try a completely different approach C. Get advice from someone else D. Adjust it slightly and try again
54. How do you feel about solving puzzles or riddles? A. I enjoy them and want to solve them logically B. I enjoy them but prefer creative guesses C. I enjoy solving them with others D. I find them fun but not something I seek out
55. When given a group problem to solve, you usually: A. Suggest a structured plan for the group B. Come up with creative ideas C. Listen to everyone before deciding D. Just start trying things with the group
56. When you make a mistake while solving something, you: A. Go back and find exactly where it went wrong B. Start over with a new approach C. Ask someone to check your work D. Fix it quickly and move on
57. What kind of problems do you enjoy solving most? A. Logical or mathematical problems B. Creative or open-ended problems C. People-related or social problems D. Practical, hands-on problems
58. If you're stuck on a question during a test, you: A. Move on and come back to it later B. Try to think of it differently C. Make an educated guess and move on D. Keep working on it until you solve it
59. When approaching a new challenge, you prefer to: A. Research and plan carefully first B. Brainstorm several possible ideas C. Ask others how they'd approach it D. Dive in and learn by doing
60. How do you usually make sense of complicated information? A. Organise it into categories or steps B. Look for the bigger picture or pattern C. Discuss it with someone to understand it better D. Apply it to a real example
61. When two possible solutions seem equally good, you: A. Compare them carefully using facts B. Go with your gut feeling C. Ask for a second opinion D. Test both and see which works better
62. In a debate or disagreement, you tend to: A. Rely on logic and evidence B. Look for a creative compromise C. Try to understand the other person's view D. Focus on what's practical and workable
63. When solving a technical issue (like a computer problem), you: A. Follow a systematic troubleshooting process B. Try random things until something works C. Search for help or ask someone D. Look for the root cause before fixing anything
64. How would you describe your general approach to problems? A. Analytical and methodical B. Creative and flexible C. Collaborative D. Practical and action-based

65. If you had to design a solution to a school problem (like long lunch queues), you would: A. Study the cause of the problem first B. Brainstorm several creative fixes C. Ask students and staff for their input D. Suggest a simple, workable fix right away
66. When facing a problem with no clear answer, you feel: A. Motivated to figure out the best possible answer B. Excited to explore different possibilities C. More comfortable working with others on it D. Eager to just try something and adjust as you go
67. How do you handle problems under time pressure? A. Stay calm and work through it systematically B. Think quickly and creatively C. Ask for help to speed things up D. Just start solving and adjust as needed
68. When solving problems, do you prefer clear rules or open exploration? A. Clear rules and steps B. A mix of both C. Depends on who I'm working with D. Open exploration, mostly
69. If a solution works but you're not sure why, you: A. Investigate until you understand it fully B. Accept it works and move on C. Ask someone to explain it D. Try it again to confirm it wasn't luck
70. When you solve a hard problem, what feels most satisfying? A. Understanding exactly how it works B. Coming up with an original idea C. Solving it as a team D. Seeing it actually work in practice
71. How do you usually respond to unexpected setbacks? A. Reassess and re-plan calmly B. Look for a creative workaround C. Reach out to others for support D. Keep pushing forward with what you have
72. When comparing your problem-solving to friends, you'd say you're more: A. Structured and careful B. Imaginative and flexible C. Cooperative D. Fast and hands-on
73. Which best describes how you handle a tricky assignment with unclear instructions? A. Ask for clarification before starting B. Interpret it your own way and start C. Discuss it with classmates first D. Just start and adjust as you learn more
74. When you're deciding how to fix something broken, you: A. Diagnose the exact issue first B. Think of unusual ways to fix it C. Ask someone experienced for advice D. Try fixing it directly and see what happens
75. What best describes your problem-solving strength? A. Logical reasoning B. Creative thinking C. Getting input from others D. Practical, hands-on action

4. Curiosity

76. How often do you find yourself wondering how things work? A. Very often, I ask "why" about everything B. Fairly often, especially about things that interest me C. Sometimes, when something catches my attention D. Rarely, I focus on what I need to know
77. If you see an unfamiliar word, you usually: A. Look it up right away B. Try to guess its meaning from context C. Ask someone what it means D. Move on without worrying about it

78. When you learn a new fact, you often: A. Want to know more about it B. Try to connect it to something else you know C. Share it with someone else D. File it away and move on
79. How do you feel about exploring topics outside your school syllabus? A. I love learning about new topics on my own B. I enjoy it when I have time C. I only explore if someone recommends it D. I mostly stick to what's required
80. When you watch a documentary or read an article, you usually: A. Want to research the topic further afterward B. Enjoy it in the moment and move on C. Discuss it with someone else D. Only pay attention if it directly relates to you
81. If something doesn't make sense to you, how do you react? A. I feel a strong urge to figure it out B. I get mildly curious but don't always follow up C. I ask someone to explain it D. I don't think about it much further
82. How do you feel about trying new things you've never done before? A. Excited, I love new experiences B. Curious but a little cautious C. I prefer to try new things with others D. I usually stick to what I know
83. When you have free time, how likely are you to look something up just because you're curious? A. Very likely, I do this often B. Somewhat likely C. Only if someone else brings it up D. Not very likely
84. Do you ask a lot of questions in class? A. Yes, I ask questions often B. Sometimes, when I'm unsure C. Rarely, I prefer to figure it out myself D. I mostly listen and take notes
85. When exploring a new place or app, you like to: A. Explore everything to see how it all works B. Explore a bit, then focus on what's useful C. Ask someone to show you around first D. Only use what you need
86. How do you feel about topics you know nothing about? A. Intrigued, I want to learn about them B. Neutral, depends on the topic C. A little unsure until I know more D. Not particularly interested
87. If a teacher mentions something interesting but off-topic, you: A. Want them to explain more B. Make a mental note to look it up later C. Ask a friend about it after class D. Let it go and focus on the lesson
88. How often do you read or watch things purely out of interest, not for school? A. Very often B. Fairly often C. Sometimes D. Rarely
89. When you don't know the answer to something, you feel: A. Determined to find out B. Mildly interested in finding out C. Comfortable asking someone who knows D. Fine not knowing right away
90. Do you enjoy asking "what if" questions about the world? A. Yes, all the time B. Occasionally C. Only in discussions with others D. Not really
91. How do you react to unexpected results, like an experiment not going as planned? A. I want to know exactly why it happened B. I find it interesting but move on C. I ask others what they think happened D. I just note it and continue

92. When browsing the internet, you're more likely to: A. Fall into research rabbit holes B. Look up specific things you need C. See what your friends are looking at D. Stick to entertainment
93. How do you feel about subjects that challenge how you see the world? A. I find them fascinating B. I find them interesting but sometimes uncomfortable C. I like discussing them with others D. I prefer subjects that feel familiar
94. If given a choice, would you rather learn about: A. How the universe works B. How people and societies work C. How to build or create things D. Whatever comes up naturally
95. Do you often wonder about things not related to school at all, like history, space, or nature? A. Yes, frequently B. Sometimes C. Only when something reminds me D. Not really
96. How do you feel when someone tells you something is "impossible to explain"? A. That makes me want to figure it out even more B. I find it a bit intriguing C. I'd want to ask an expert D. I accept it and move on
97. When you finish a class, do you ever think about follow-up questions? A. Often, I think of more things I want to know B. Sometimes C. Only if I discuss it with a friend D. Not usually
98. How do you approach unfamiliar subjects in general? A. With excitement to explore B. With mild interest C. With interest if others are involved D. With caution, preferring the familiar
99. Do you like collecting interesting facts or trivia? A. Yes, I enjoy learning random facts B. Sometimes, if it's interesting C. I enjoy sharing facts others find D. Not particularly
100. What best describes your curiosity? A. I want to know how and why everything works B. I'm curious about specific things I love C. I get curious when others spark my interest D. I'm mostly focused on what's useful to me

5. Creativity

101. When given a task, how do you usually start? A. I imagine several different ways to approach it B. I follow the most obvious method first C. I ask others for ideas D. I just start and adjust as I go
102. How do you feel about art, music, or creative writing? A. I love creating original work B. I enjoy it sometimes C. I enjoy watching or listening more than creating D. It's not really my thing
103. If asked to solve a problem in an unusual way, you would: A. Enjoy the challenge and think outside the box B. Try, but prefer a straightforward solution C. Ask others for creative input D. Prefer a proven method instead
104. When decorating or designing something (like a room or a poster), you: A. Come up with your own unique ideas B. Get inspiration from others and adapt it C. Ask someone else to help decide D. Prefer to use a template or guide

105. How do you feel about coming up with new ideas in group projects? A. I often suggest original ideas B. I build on other people's ideas C. I prefer picking the best idea from the group D. I prefer following an existing plan
106. When you write a story or essay, you like to: A. Create unusual characters or plots B. Follow familiar, relatable structures C. Write about real experiences D. Get straight to the point with facts
107. Do you enjoy activities like drawing, designing, or inventing things? A. Yes, very much B. Sometimes, depending on the activity C. I enjoy watching others do it D. Not really my interest
108. How do you approach a blank page or an open-ended assignment? A. Excited by the freedom to create anything B. A little unsure, but I get into it eventually C. I'd rather have more direction D. I prefer clear instructions from the start
109. When you imagine your future, do you picture yourself: A. Creating something new and original B. Improving on existing things C. Working closely with a creative team D. Doing practical, useful work
110. How do you feel about "thinking outside the box"? A. I enjoy it and do it often B. I can do it when needed C. I prefer combining others' ideas D. I prefer sticking to known methods
111. When faced with a fashion, design, or style choice, you: A. Like to try something bold and different B. Like to put your own twist on trends C. Prefer what your friends are doing D. Prefer safe, simple choices
112. Do you enjoy making things with your hands, like crafts or models? A. Yes, I love hands-on creative projects B. Sometimes, if I have the time C. I enjoy it more with others D. Not particularly
113. How do you feel about improvising, like in drama or music, without a script? A. I enjoy the freedom of improvising B. I can do it, but I prefer some structure C. I'd rather work with a group on it D. I prefer having a clear script or plan
114. When you see something ordinary, do you ever imagine new uses for it? A. Often, my mind naturally does this B. Sometimes C. Only if someone points it out D. Not really
115. How would your friends describe your ideas? A. Original and imaginative B. Practical with a creative touch C. Good at combining everyone's ideas D. Straightforward and realistic
116. When solving a design problem, like planning an event, you prefer to: A. Create a unique theme or concept B. Adapt ideas from past events C. Ask others what they'd enjoy D. Focus on what's easy to organise
117. How often do you daydream about new inventions or ideas? A. Often B. Sometimes C. Rarely, unless discussing it with friends D. Rarely at all
118. When given creative freedom on a project, how do you feel? A. Energised and inspired B. A little excited, a little unsure C. I prefer having a group to brainstorm with D. I'd rather have clear guidelines

119. Do you enjoy activities like photography, videography, or graphic design? A. Yes, a lot B. Occasionally C. I enjoy viewing others' work D. Not particularly
120. What best describes your creative style? A. Bold and original B. Practical with creative touches C. Collaborative, building on others' ideas D. Straightforward, function over form
121. When brainstorming, you usually: A. Come up with many unusual ideas quickly B. Think of a few solid, workable ideas C. Build on what others suggest D. Wait to hear ideas before contributing
122. How do you feel about mixing subjects, like combining art and science? A. I love finding creative connections between subjects B. I find it interesting occasionally C. I like hearing how others combine ideas D. I prefer keeping subjects separate and clear
123. If your school needed a new logo or mascot, would you want to help design it? A. Yes, I'd love to create something original B. Maybe, if I had some direction C. I'd rather give feedback on others' designs D. I'd rather leave it to someone else
124. How comfortable are you sharing an unusual idea with a group? A. Very comfortable, I enjoy it B. Fairly comfortable C. A little nervous but willing D. I usually keep unusual ideas to myself
125. What role do you usually play in a creative project? A. Idea generator B. Idea refiner C. Coordinator, bringing ideas together D. Executor, making the plan happen

6. Leadership

126. When working in a group, you tend to: A. Naturally take charge and organise the team B. Offer ideas but let someone else lead C. Support whoever is leading D. Prefer to work independently within the group
127. How do you feel about being in charge of a project? A. I enjoy taking responsibility B. I'm comfortable with it if needed C. I prefer sharing leadership with others D. I'd rather not lead if I can help it
128. When a group disagrees on a decision, you usually: A. Step in to help the group reach an agreement B. Share your opinion and let the group decide C. Listen carefully and support the majority D. Stay quiet and go along with whatever is chosen
129. If your group is falling behind on a task, what do you usually do? A. Take initiative to reorganise the team B. Suggest a plan to catch up C. Encourage everyone to keep going D. Focus on completing your own part well
130. How do you feel about giving instructions to others? A. Comfortable, I do it naturally B. Comfortable when I know what I'm doing C. A little uneasy, but I can do it D. I prefer receiving instructions instead
131. When you see a problem in your school or community, you usually: A. Try to organise others to fix it B. Suggest solutions to those in charge C. Support efforts already underway D. Focus on what you personally can do

132. Have you ever been chosen (or volunteered) to lead a class or group activity? A. Yes, often B. Yes, a few times C. Rarely D. Never, I prefer not to
133. How do you handle it when people disagree with your ideas? A. I explain my reasoning and try to find common ground B. I consider their views and adjust if needed C. I usually go along with the group D. I prefer to avoid the disagreement
134. When assigning tasks in a group project, you prefer to: A. Decide who does what based on strengths B. Let the group decide together C. Take whatever task is left D. Let someone else assign the roles
135. How comfortable are you speaking in front of a group? A. Very comfortable B. Fairly comfortable C. A little nervous, but I manage D. I prefer not to
136. When your group needs motivation, you usually: A. Step up to encourage everyone B. Support whoever is encouraging the group C. Quietly keep working to set an example D. Wait for someone else to motivate the group
137. Do you enjoy organising events or activities for others? A. Yes, I enjoy planning and organising B. Sometimes, if I have help C. I prefer helping with someone else's plan D. Not really my thing
138. How do you respond when you're given a leadership role unexpectedly? A. I take it on confidently B. I accept it and figure it out as I go C. I feel nervous but try my best D. I try to hand it off if possible
139. When mentoring or helping a younger student, you feel: A. Confident and eager to guide them B. Willing to help when asked C. More comfortable helping quietly, one-on-one D. Unsure of how to guide someone else
140. In a class election or vote, you're more likely to: A. Run for a leadership position B. Support a candidate you believe in C. Vote but stay uninvolved otherwise D. Not pay much attention to it
141. How do you feel about making decisions that affect a whole group? A. I feel confident making those decisions B. I feel okay if I have input from others C. I prefer the group to decide together D. I'd rather not be the one deciding
142. When there's a conflict in your group, you usually: A. Step in to help resolve it B. Offer your perspective to help C. Encourage others to talk it out D. Stay out of it
143. What role do you naturally take in most group settings? A. The leader or organiser B. The idea contributor C. The supporter and encourager D. The independent worker
144. How do you feel about being responsible for other people's success? A. I embrace that responsibility B. I'm comfortable sharing that responsibility C. I prefer being responsible mainly for myself D. I find that pressure uncomfortable
145. When starting a new club or group activity, you would rather: A. Lead and organise it B. Help plan it with others C. Join in once it's set up D. Support from the sidelines
146. How do you feel about being held accountable for a group's results? A. I welcome it, I like the responsibility B. I'm okay with it if the roles are clear C. I prefer shared accountability with the group D. I'd rather be accountable only for my own part

147. When a group needs someone to make the final call, you usually: A. Step up and decide B. Offer a recommendation and let the group choose C. Wait for consensus before deciding D. Prefer someone else makes the final call
148. How do you feel about setting goals or direction for a team? A. I enjoy setting the vision for the group B. I like contributing to the group's goals C. I prefer following goals the group agrees on D. I prefer goals to be set by someone else
149. When someone on your team needs guidance, you usually: A. Step in confidently to guide them B. Offer help if they ask C. Encourage them and point them to the right resource D. Let them work it out themselves
150. How do others usually see you in group settings? A. As someone who takes charge B. As someone who contributes strong ideas C. As someone who keeps the group positive D. As someone who quietly gets things done

7. Teamwork

151. When working on a group project, you enjoy most: A. Coordinating everyone's efforts B. Sharing and building on ideas together C. Supporting your teammates D. Focusing on your individual part of the work
152. How do you feel about relying on others to complete a task? A. I trust the team and share responsibility B. I'm okay with it if roles are clear C. I prefer to double-check others' work D. I'd rather do it myself to be sure
153. When a teammate is struggling, you usually: A. Offer to help them directly B. Encourage them and check in often C. Let the teacher or group leader know D. Focus on your own tasks and trust they'll manage
154. How do you handle disagreements within a team? A. Talk it through calmly until we agree B. Compromise so everyone is satisfied C. Let the majority decide D. Avoid conflict and go with the flow
155. Do you prefer working: A. In a large team B. In a small group C. With just one partner D. Alone
156. How do you feel about sharing credit for group success? A. I'm happy to share credit equally B. I'm fine with it as long as everyone contributed C. I don't think about it much D. I prefer recognition for my individual effort
157. When your team has different opinions on how to do something, you: A. Help find a solution everyone agrees on B. Support the idea that seems best for the group C. Go with what most people want D. Voice your own opinion and stick to it
158. How do you usually communicate with your teammates during a project? A. Frequently, to keep everyone updated B. Regularly, when there's something important C. Mostly when asked D. Rarely, I prefer working independently
159. What do you value most in a team? A. Clear organisation and roles B. Good communication C. Support and encouragement D. Everyone doing their fair share

160. How do you feel when a group project doesn't go as planned? A. I try to fix it and keep the team on track B. I stay positive and adjust with the team C. I feel frustrated but keep supporting the group D. I focus on making sure my part is still solid
161. Do you enjoy brainstorming ideas as a group? A. Yes, I love collaborative brainstorming B. Sometimes, depending on the group C. I prefer listening and choosing the best idea D. I prefer thinking through ideas alone first
162. How do you handle it when a teammate isn't doing their share of work? A. Talk to them directly about it B. Offer to help them catch up C. Mention it to the teacher or group leader D. Quietly pick up the extra work yourself
163. What's your usual role when working in a team? A. Organiser B. Idea contributor C. Peacemaker or motivator D. Independent task-doer
164. How do you feel about team-building activities? A. I really enjoy them B. I enjoy them sometimes C. I go along with them D. I'd rather not participate
165. When your team succeeds, how do you usually feel? A. Proud of how well we worked together B. Happy that everyone's ideas came together C. Glad I could support the team D. Satisfied that I did my part well
166. How comfortable are you giving feedback to teammates? A. Very comfortable B. Fairly comfortable, if it's constructive C. A little uneasy, but I'll do it kindly D. I prefer not to give feedback directly
167. Do you find it easy to trust others with important tasks? A. Yes, I trust the team fully B. Mostly, depending on the person C. I like to check in occasionally D. I prefer handling important tasks myself
168. When joining a new group, you usually: A. Take initiative to get to know everyone B. Wait to be introduced, then get involved C. Observe first before contributing D. Focus on the task rather than the people
169. How do you feel about compromising your own ideas for the team? A. I'm happy to compromise for the group's benefit B. I compromise if the reasoning makes sense C. I compromise, but it can be hard D. I prefer sticking with my own approach
170. What best describes you in a team setting? A. A natural collaborator B. A helpful contributor C. A supportive teammate D. An independent worker who still gets things done

8. Persistence

171. When something is really difficult, you usually: A. Keep trying until you succeed B. Take a break, then come back to it C. Ask for help and keep going D. Move on to something else
172. How do you react when you fail at something the first time? A. I try again immediately with a new approach B. I take some time to think, then try again C. I ask for advice before trying again D. I feel discouraged and may not try again soon

173. When learning a new skill that's hard for you, you: A. Practice consistently until you improve B. Practice when you feel motivated C. Practice with support from others D. Give it a few tries, then decide if it's worth continuing
174. How long do you usually stick with a difficult task before giving up? A. As long as it takes B. Quite a while, unless it's clearly not working C. A while, especially with encouragement D. Not very long if I'm not seeing progress
175. When you set a goal, how often do you follow through? A. Almost always B. Most of the time C. Sometimes, depending on the goal D. It varies a lot
176. How do you feel about setbacks or failures? A. They motivate me to try harder B. They're frustrating but I bounce back C. They're discouraging, but support helps D. They make me want to try something different
177. If a project takes much longer than expected, you: A. Stay committed until it's finished B. Adjust your plan and keep working C. Ask for help to speed things up D. Consider whether it's still worth finishing
178. When working towards a long-term goal, like exams months away, you: A. Stay consistent over the whole period B. Work steadily with occasional breaks C. Need reminders to stay on track D. Tend to focus mostly near the deadline
179. How do you respond to criticism of your work? A. I use it to improve and keep going B. I take it in, then adjust C. It affects me, but I push through D. I sometimes lose motivation
180. When you're tired but still have work to finish, you: A. Push through and complete it B. Take a short break, then finish it C. Ask someone to help you get through it D. Leave it for another time if possible
181. How do you handle repeated failure at the same task? A. Try a completely new strategy and keep going B. Take a step back, then try again C. Seek guidance to understand what's going wrong D. Consider whether to try something else instead
182. What keeps you going when things get hard? A. My determination to finish what I start B. Remembering why the goal matters to me C. Support from people around me D. Knowing I can always try a new approach
183. When a hobby or activity becomes challenging, you: A. Work harder to get better at it B. Keep enjoying it at your own pace C. Ask someone experienced for tips D. Might try a different hobby instead
184. How do you feel about slow progress towards a goal? A. I stay patient and keep working B. It's okay as long as I see some progress C. It's frustrating but I keep going with support D. I get impatient and may lose interest
185. When you commit to something, how reliable are you at seeing it through? A. Very reliable, I always finish what I start B. Mostly reliable C. Reliable when I have support D. It depends on how interested I stay
186. How do you react to obstacles that weren't part of your original plan? A. I find a way around them and keep going B. I adapt my plan and continue C. I look for help to overcome them D. I might reconsider my approach entirely

187. What's your attitude towards challenges in general? A. I welcome them as opportunities to grow B. I accept them and work through them C. I feel more confident facing them with others D. I prefer to avoid unnecessary challenges
188. When you're the only one still working on something the group gave up on, you: A. Keep going because you believe in finishing it B. Continue if you still see value in it C. Look for someone to help you finish it D. Consider whether it's worth continuing alone
189. How do you feel after finally succeeding at something difficult? A. Deeply proud, it was worth every effort B. Relieved and satisfied C. Grateful for the support that helped me D. Happy, and ready for the next challenge
190. Which statement best describes you? A. "I don't give up easily" B. "I keep going, but I know when to pause" C. "I keep going with a little help" D. "I know when it's time to try something new"

9. Motivation

191. What motivates you most to do well in school? A. Personal pride in doing my best B. Achieving specific goals, like a certain grade C. Making my family proud D. Preparing for a career I want
192. When you complete a task well, what matters most to you? A. Knowing I did my personal best B. Reaching the target I set C. Others recognising my effort D. Knowing it helps me move toward my future goals
193. What gets you excited to start your day? A. The chance to learn something new B. Working toward my goals C. Spending time with friends and family D. Opportunities to achieve something meaningful
194. When you're feeling unmotivated, what usually helps you get back on track? A. Reminding yourself of your personal standards B. Focusing on your goals and deadlines C. Talking to someone who supports you D. Thinking about your future plans
195. Which reward matters more to you? A. The satisfaction of doing something well B. Achieving a clear result or milestone C. Praise or appreciation from others D. Progress toward a long-term dream
196. How do you feel about competition? A. It pushes me to improve myself B. It motivates me to hit specific targets C. I enjoy it more when it's friendly and social D. I focus more on my own growth than beating others
197. What kind of goals motivate you most? A. Personal growth goals B. Clear, measurable goals C. Goals that involve people I care about D. Goals connected to my future career
198. When you achieve something, who do you want to tell first? A. I mostly feel satisfied internally B. Whoever helped me track my progress C. My family or close friends D. I think about how it helps my next step

199. What would disappoint you more? A. Not living up to your own standards B. Missing a goal you set for yourself C. Letting down someone who believed in you D. Not making progress toward your future
200. How do you feel about receiving praise for your work? A. I appreciate it, but I mostly care about my own opinion of my work B. I appreciate it, especially when I've hit a goal C. It means a lot to me D. It's nice, but I care more about long-term progress
201. What keeps you working hard even when no one is watching? A. My own standards and values B. My personal goals C. Thinking about the people who count on me D. My vision for my future
202. When choosing an extracurricular activity, you're drawn to ones that: A. Help you grow as a person B. Help you achieve something specific C. Let you spend time with others D. Build toward your future plans
203. What does success mean to you? A. Becoming the best version of myself B. Reaching the goals I've set C. Making the people I love proud D. Building a good future for myself
204. How do you feel when working toward something with no immediate reward? A. I stay motivated because it matters to me B. I stay motivated if I can track progress C. I need occasional encouragement to keep going D. I stay motivated by imagining the future payoff
205. Which statement feels most true to you? A. "I push myself to be better every day" B. "I set goals and work to achieve them" C. "I'm motivated by the people around me" D. "I always keep my future in mind"
206. What usually drives you to try harder in a subject you find difficult? A. Wanting to master it for yourself B. Wanting to reach a specific grade C. Encouragement from teachers or family D. Knowing it matters for your future path
207. How important is recognition to your motivation? A. Not very, I'm driven by my own standards B. Somewhat, especially when I reach a goal C. Fairly important to me D. Less important than long-term progress
208. When you imagine your future career, what excites you most? A. Becoming skilled and respected in what I do B. Achieving specific milestones and success C. Making a difference for people around me D. Building the life I've always dreamed of
209. What helps you stay consistent with your goals? A. My personal discipline B. Tracking my progress carefully C. Support and encouragement from others D. Keeping my future goals in mind
210. Which best sums up what drives you? A. Self-improvement B. Achievement C. Connection with others D. A clear vision for the future

10. Career Interests

211. Which of these activities appeals to you most? A. Solving technical or scientific problems B. Helping and caring for people C. Creating designs, art, or content D. Organising and managing projects

212. If you had a free afternoon to explore a career, you'd want to: A. Visit a lab or workshop B. Shadow a doctor or counsellor C. Sit in on a design or media studio D. Observe how a business is run
213. Which subject do you find yourself most drawn to? A. Science and mathematics B. Biology and health-related topics C. Art, literature, or media D. Business and economics
214. When imagining your future job, what matters most to you? A. Solving interesting problems B. Helping others directly C. Expressing creativity D. Leading or building something
215. Which of these would you enjoy learning more about? A. How machines and technology work B. How the human body works C. How stories and media are made D. How businesses grow and succeed
216. If you joined a school club, which would interest you most? A. Science or robotics club B. Health or first-aid club C. Art or drama club D. Debate or entrepreneurship club
217. Which task would you enjoy doing for a whole day? A. Building or fixing something B. Supporting someone through a difficult time C. Designing something new D. Planning and organising an event
218. What kind of impact do you want your future career to have? A. Advancing knowledge or technology B. Improving people's health or wellbeing C. Inspiring or entertaining others D. Growing something successful
219. Which career field sounds most exciting to explore further? A. Engineering or computer science B. Medicine or healthcare C. Arts, media, or communication D. Business or law
220. If you had to choose a summer internship, you'd pick one in: A. A tech company or research lab B. A hospital or clinic C. A design studio or media house D. A company or start-up
221. Which of these would you rather spend your career doing? A. Inventing or improving things B. Caring for or treating people C. Creating content people enjoy D. Managing people or resources
222. What kind of problems do you want to spend your career solving? A. Technical or scientific challenges B. Health and wellbeing challenges C. Communication or creative challenges D. Business or organisational challenges
223. Which best describes the kind of work environment you'd enjoy? A. A lab, workshop, or tech environment B. A hospital, clinic, or care setting C. A studio or creative agency D. An office or business setting
224. If money wasn't a factor, which of these would you choose to study? A. Engineering or computer science B. Medicine or public health C. Fine arts or communication D. Business or finance
225. Which type of achievement would make you proudest? A. Building or discovering something new B. Helping someone recover or improve their life C. Creating something people connect with D. Growing a successful venture

226. What draws you to a career more than anything else? A. Intellectual challenge B. Making a difference in people's lives C. Self-expression D. Growth and leadership opportunities
227. Which role would you enjoy in a school project about your future? A. Researching the technical details B. Focusing on the human impact C. Presenting the creative angle D. Organising the overall plan
228. Which of these sounds like the ideal career to you? A. A career centred on discovery and innovation B. A career centred on care and service C. A career centred on creativity and expression D. A career centred on leadership and strategy
229. What would you want people to say about your career one day? A. "They solved important problems" B. "They made a real difference in people's lives" C. "They created something meaningful" D. "They built something successful"
230. Which best matches your idea of a fulfilling career? A. One that challenges your mind B. One that helps others C. One that lets you express yourself D. One that lets you lead and grow something

11. Decision Making

231. When making an important decision, you usually: A. Gather all the facts first B. Trust your instincts C. Ask others for advice D. Weigh the pros and cons carefully
232. How do you feel about making quick decisions? A. I prefer to take my time instead B. I'm comfortable deciding quickly when needed C. I like to check with someone first D. I decide quickly but review it after
233. When choosing between two good options, you usually: A. Research more before deciding B. Go with what feels right C. Ask someone you trust D. List out the advantages of each
234. How do you make decisions under pressure? A. I stay calm and think it through logically B. I go with my gut feeling C. I look for guidance from someone nearby D. I try to think fast and stay flexible
235. When you're unsure about a decision, what helps you most? A. More information or research B. Sleeping on it and reflecting C. Talking to friends or family D. Comparing the possible outcomes
236. How often do you change your mind after making a decision? A. Rarely, I stick with my choice B. Sometimes, if new information comes up C. Occasionally, especially after talking to others D. Fairly often, if I find a better option
237. When choosing a subject or activity, what matters most? A. What makes logical sense for my future B. What feels right to me C. What people I trust recommend D. What has the best possible outcome
238. How do you approach decisions that affect other people? A. I think it through carefully to be fair B. I consider how it feels to everyone involved C. I ask others for their input D. I weigh the impact on everyone before deciding

239. When you have to choose between something safe and something risky, you usually:
A. Choose based on the facts and likely outcome B. Go with whichever feels more right C. Ask someone you trust for their opinion D. Weigh the risk against the potential reward
240. How do you feel after making a big decision? A. Confident, because I researched it well B. At peace, because it felt right C. Reassured, because others supported it D. Satisfied, because I considered all angles
241. When faced with too many choices, you tend to: A. Narrow them down using clear criteria B. Choose the one that feels most natural C. Ask someone to help you decide D. Compare them all before deciding
242. How do you usually decide what to do with your free time? A. Think about what would be most useful B. Go with whatever feels enjoyable C. See what friends are doing D. Weigh a few options and pick the best one
243. When making decisions about your future, you rely most on: A. Research and facts B. Your own feelings and passions C. Advice from people you trust D. A careful comparison of your options
244. How comfortable are you making decisions without anyone else's input? A. Very comfortable B. Comfortable, if it feels right C. A little uneasy, I prefer input D. Comfortable, as long as I've thought it through
245. What's your biggest strength when making decisions? A. Being thorough and logical B. Trusting your instincts C. Considering others' perspectives D. Weighing all possible outcomes
246. When a decision doesn't turn out well, you usually: A. Analyse what went wrong B. Trust that it was the right call at the time C. Talk to others about what to do next D. Learn and adjust your approach
247. How do you decide which university course might be right for you? A. Researching career paths and requirements B. Following what genuinely excites you C. Getting advice from people you trust D. Comparing several options carefully
248. When choosing how to spend your money, you usually: A. Think it through carefully first B. Buy what feels right in the moment C. Ask someone for their opinion D. Compare value before deciding
249. How do you feel about decisions with no clear right answer? A. I still try to find the most logical choice B. I go with what feels best C. I like getting perspectives from others D. I compare outcomes as best I can
250. Which best describes your decision-making style? A. Careful and analytical B. Instinctive and personal C. Collaborative D. Balanced and comparative

12. Communication

251. How do you prefer to express your ideas? A. Through writing B. Through speaking C. Through pictures or visuals D. Through actions or demonstrations

252. When explaining something to a friend, you usually: A. Use clear, simple words B. Use examples and stories C. Use gestures or drawings D. Show them directly
253. How comfortable are you speaking in front of a large group? A. Very comfortable B. Fairly comfortable C. A little nervous, but manageable D. Not very comfortable
254. When you disagree with someone, how do you usually express it? A. Calmly and directly B. Diplomatically, choosing my words carefully C. I sometimes hold back my true opinion D. I express it strongly
255. How do you prefer to receive information? A. In writing, like an email or message B. In conversation C. Through pictures, charts, or videos D. Through a demonstration
256. When working with someone from a different background, you: A. Try to understand their perspective first B. Communicate clearly and openly C. Adjust your communication style to fit theirs D. Focus mainly on the task at hand
257. How do you feel about giving presentations? A. I enjoy them B. I'm okay with them C. I get nervous but manage D. I try to avoid them if possible
258. When texting or messaging friends, you tend to: A. Write detailed messages B. Keep messages short and to the point C. Use lots of emojis or images D. Prefer calling instead of texting
259. How do you handle misunderstandings with others? A. I clarify things calmly and directly B. I try to see their point of view C. I ask someone to help mediate D. I let it go if it's not a big deal
260. When you have an important message to share, you prefer to: A. Write it out carefully B. Say it in person or over a call C. Use pictures, diagrams, or visuals D. Show through action
261. How do you feel about public speaking or debating? A. I enjoy the challenge B. I'm fairly confident with practice C. It makes me nervous, but I can do it D. I prefer not to
262. When listening to others, you usually: A. Focus closely on their words and meaning B. Notice their tone and body language too C. Ask questions to understand better D. Wait for your turn to respond
263. How would you describe your communication style? A. Direct and clear B. Warm and friendly C. Thoughtful and careful D. Expressive and animated
264. When you need to persuade someone, you rely on: A. Facts and logical arguments B. Emotional connection and storytelling C. Building trust and rapport D. Confidence and enthusiasm
265. How comfortable are you giving feedback to someone? A. Very comfortable, I say it directly B. Comfortable, if I frame it kindly C. A little uneasy about it D. I prefer someone else gives it
266. When writing an essay or report, you focus most on: A. Clarity and structure B. Making it interesting to read C. Getting the facts right D. Keeping it short and to the point

267. How do you handle group discussions? A. I actively contribute ideas B. I listen first, then share my views C. I encourage quieter members to speak D. I mostly listen unless asked directly
268. When explaining a mistake you made, you usually: A. Explain honestly and directly B. Explain with context so it's understood clearly C. Feel a bit anxious but explain calmly D. Prefer to show it was fixed rather than explain it
269. How do you feel about communicating with people you don't know well? A. Comfortable, I can talk to anyone B. Comfortable once we find common ground C. A little shy at first D. I prefer communicating through action rather than words
270. What best describes your communication strength? A. Clarity B. Persuasiveness C. Empathy and listening D. Confidence

13. Time Management

271. How do you usually manage your daily schedule? A. I plan out each day in detail B. I have a rough idea and adjust as needed C. I rely on reminders and to-do lists D. I go with the flow
272. When you have multiple tasks to do, you usually: A. Prioritise by importance B. Prioritise by deadline C. Do the easiest ones first D. Do whatever feels most urgent at the time
273. How often do you finish tasks ahead of schedule? A. Almost always B. Often C. Sometimes D. Rarely, I usually finish right before deadlines
274. How do you feel about deadlines? A. They help me stay organised B. They motivate me to get things done C. They cause me some stress but I manage D. They often sneak up on me
275. When you have a free hour, how do you usually spend it? A. Getting ahead on upcoming tasks B. Relaxing, then getting back to tasks C. Whatever feels most needed at the time D. Whatever I feel like in the moment
276. How do you keep track of your time during the day? A. I use a planner or schedule B. I check the clock regularly C. I rely on reminders from my phone D. I don't track it closely
277. When juggling school, activities, and free time, you: A. Balance them with a clear plan B. Manage them reasonably well C. Sometimes struggle to fit everything in D. Often feel like there isn't enough time
278. How do you usually react when a task takes longer than expected? A. Adjust my schedule calmly B. Feel a bit stressed but manage C. Ask for help to catch up D. Push other tasks aside to finish it
279. Do you prefer having a strict routine or flexibility in your day? A. A strict, structured routine B. A loose routine with some structure C. Mostly flexible D. Completely flexible, no set routine

280. How far in advance do you usually start working on assignments? A. As soon as they're given B. A few days after they're given C. About a week before the deadline D. Close to the deadline
281. How do you feel about multitasking? A. I avoid it, I prefer focusing on one thing B. I can do it occasionally when needed C. I multitask fairly often D. I multitask most of the time
282. When you're running low on time for a task, you usually: A. Focus on completing the most important parts B. Work faster to complete everything C. Ask for an extension if possible D. Rush through and hope for the best
283. How do you usually spend your weekends? A. Balancing study, rest, and activities B. Mostly catching up on schoolwork C. Mostly relaxing and socialising D. It varies a lot from week to week
284. How do you feel your time management compares to your classmates? A. Better than most B. About average C. I struggle a bit more than others D. It varies depending on the week
285. What usually causes you to lose track of time? A. Getting absorbed in interesting work B. Social media or entertainment C. Talking with friends D. Unexpected interruptions
286. How do you prepare for a big event, like an exam or presentation? A. Plan and prepare well in advance B. Prepare steadily over a few days C. Prepare mostly the day before D. Prepare at the last minute
287. When you set a personal deadline, how likely are you to meet it? A. Very likely B. Fairly likely C. Sometimes D. Rarely, I tend to push it back
288. How do you handle unplanned interruptions to your schedule? A. Adjust calmly and get back on track B. Get a little frustrated but manage C. Struggle to regain focus D. Often lose track of the rest of my plan
289. What tool or method helps you manage time best? A. A written planner or calendar B. Phone reminders and alarms C. To-do lists D. I mostly manage without any tool
290. Which best describes your relationship with time? A. I'm very organised and punctual B. I'm mostly on top of things C. I manage, but it takes effort D. I often feel like time gets away from me

14. Confidence

291. How do you feel about trying something you might fail at? A. Confident, I'm willing to take the risk B. A bit nervous, but I'll try C. Hesitant, but I push through D. I prefer to avoid the risk of failing
292. How do you handle criticism of your work? A. I take it well and use it to improve B. It stings a little, but I recover quickly C. It affects me for a while D. I try not to let it show, but it's hard

293. When you achieve something, how do you usually feel? A. Proud and confident in my abilities B. Happy, but I don't dwell on it much C. Relieved more than proud D. Grateful, but I wonder if I got lucky
294. How comfortable are you sharing your opinion in a group? A. Very comfortable B. Comfortable most of the time C. A little nervous, but I'll speak up D. I usually keep my opinions to myself
295. When you make a mistake in front of others, you usually: A. Laugh it off and move on B. Feel a little embarrassed but recover quickly C. Feel quite self-conscious about it D. Try to avoid drawing attention to it
296. How do you feel about your own abilities compared to others? A. Confident in my strengths B. Fairly confident, with room to grow C. Unsure at times D. I often compare myself and feel behind
297. When facing a new challenge, your first thought is usually: A. "I can figure this out" B. "This might be hard, but I'll try" C. "I hope I don't mess this up" D. "I'm not sure I can do this"
298. How do you handle compliments? A. I accept them confidently B. I appreciate them, a little shyly C. I sometimes brush them off D. I find them a bit uncomfortable
299. When starting something new, like a new school or activity, you feel: A. Excited and self-assured B. A little nervous but hopeful C. Anxious but willing to adjust D. Quite uneasy about it
300. How do you feel about setting ambitious goals for yourself? A. I set them confidently and go for them B. I set them, with some doubt C. I set smaller, safer goals instead D. I avoid setting goals that feel too big
301. When someone challenges your opinion, you usually: A. Defend it confidently with reasoning B. Consider their point but stand your ground C. Start doubting yourself a little D. Often change your opinion to avoid conflict
302. How do you feel walking into a room full of strangers? A. Comfortable and open B. A little nervous, but I warm up quickly C. Anxious until I know someone D. Quite uncomfortable
303. How do you view your own strengths? A. I know them clearly and use them confidently B. I'm aware of some of them C. I sometimes underestimate them D. I find it hard to recognise my strengths
304. When you don't know the answer in class, you usually: A. Say so confidently and ask for help B. Feel a little unsure but ask anyway C. Avoid drawing attention to it D. Prefer to stay quiet
305. How do you feel about competing with others? A. Confident, I enjoy the challenge B. A little nervous, but excited too C. Uneasy, I prefer not to compete D. I avoid competition when I can
306. When given positive feedback, how do you usually respond internally? A. "I earned this" B. "That's nice to hear" C. "I hope I can keep it up" D. "I got lucky this time"

307. How do you feel about representing your class or school in an event? A. Confident and proud to do it B. A little nervous, but willing C. Anxious about the pressure D. I'd rather not be chosen
308. When you look in the mirror before a big day, you usually feel: A. Confident and ready B. Cautiously optimistic C. A bit unsure D. Nervous about how things will go
309. How do you typically handle setbacks to your confidence, like a poor grade? A. Stay confident and bounce back quickly B. Feel down briefly, then recover C. It takes a while to feel confident again D. It really shakes my confidence
310. Which statement feels closest to true for you? A. "I believe in my abilities" B. "I'm growing more confident over time" C. "I have confidence in some areas, not others" D. "I often doubt myself"

15. Academic Interests

311. Which school subject do you look forward to most? A. Mathematics B. Science (Biology, Chemistry, Physics) C. Languages or Literature D. Social Studies or Economics
312. If you had an extra elective to choose, what would you pick? A. Computer Science B. Additional Science C. Art or Music D. Business Studies
313. Which type of school project excites you most? A. A maths or logic-based project B. A science experiment C. A creative writing or art project D. A business or economics case study
314. When reading for fun, what kind of books do you usually reach for? A. Puzzle books or non-fiction on how things work B. Books about nature, biology, or the human body C. Fiction, poetry, or storytelling D. Books about business, leadership, or current affairs
315. Which topic would you enjoy researching for a school assignment? A. A scientific discovery B. A health or medical topic C. A historical or cultural topic D. An economic or business trend
316. What kind of school competitions interest you most? A. Maths or science olympiads B. Health or science fairs C. Debate, essay, or poetry contests D. Business plan or case competitions
317. Which class discussion topic would you enjoy most? A. How technology is changing the world B. How the human body fights disease C. How literature reflects society D. How economies grow and change
318. If you joined an academic club, which would you choose? A. Maths or robotics club B. Science or biology club C. Literary or debate club D. Economics or business club
319. Which subject do you find yourself naturally good at? A. Mathematics B. Science C. Languages and communication D. Social studies or business
320. When you finish a test, which subject do you usually feel best about? A. Maths B. Science C. English or literature D. Social studies or economics

321. Which of these documentaries would you choose to watch? A. One about space or physics B. One about the human body or medicine C. One about history or culture D. One about global economics
322. What kind of essay topic would you enjoy writing about? A. A scientific theory B. A health-related issue C. A social or cultural issue D. An economic policy
323. Which school event would you be most excited to attend? A. A science fair B. A health awareness fair C. A cultural or literary festival D. A business exhibition
324. If given a free study period, which subject would you choose to explore further? A. Maths B. Biology or chemistry C. Literature or languages D. Economics or business
325. Which of these general knowledge quiz categories would you do best in? A. Science and technology B. Health and biology C. Arts and literature D. Business and current affairs

16. Technology Interest

326. How do you feel about learning to code or program? A. Very interested, I'd love to learn B. Somewhat interested C. Interested if it's required D. Not particularly interested
327. When a new gadget or app comes out, you usually: A. Want to try it and understand how it works B. Try it if a friend recommends it C. Use it once it's popular D. Don't pay much attention to new tech
328. How comfortable are you troubleshooting a technical problem, like a computer glitch? A. Very comfortable, I enjoy figuring it out B. Fairly comfortable, I can usually manage C. I prefer asking someone for help D. I avoid it if I can
329. Which activity would you enjoy most? A. Building a simple app or website B. Learning how computers and networks work C. Exploring virtual reality or gaming technology D. Using technology just for everyday tasks
330. How interested are you in how artificial intelligence works? A. Very interested, I want to understand it deeply B. Interested, I follow the news about it C. Somewhat curious D. Not particularly interested
331. If your school offered a robotics club, would you join? A. Yes, definitely B. Maybe, if I had time C. Only if a friend joined too D. Probably not
332. How do you feel about spending time learning new software or tools? A. I enjoy exploring new tools on my own B. I'm willing to learn when needed C. I prefer being taught how to use them D. I avoid it unless necessary
333. Which of these would you enjoy building? A. A website or app B. A simple robot or gadget C. A video game D. None of these particularly
334. How often do you think about how the technology around you actually works? A. Often, I like understanding the "how" B. Sometimes, when something interests me C. Rarely, I just use it D. Never really thought about it
335. Which tech-related career sounds most appealing? A. Software developer B. Systems or network engineer C. Game designer D. None of these appeal to me strongly

336. How do you feel about online security and how data is protected? A. Very interested in how it works B. Interested, especially as it affects me C. Aware of it but not particularly curious D. Not something I think about much
337. If you had to fix a broken device yourself, you would: A. Try to understand and fix it B. Look up a tutorial and attempt it C. Ask someone who knows how D. Take it to be fixed by a professional
338. How much do you enjoy using computers or smartphones beyond social media? A. A lot, I explore their features often B. Somewhat, for specific tasks C. Mainly for schoolwork D. Mostly for entertainment
339. Which of these topics would you want to learn more about? A. How software and apps are built B. How the internet works C. How video games are designed D. None of these particularly
340. How do you feel about a future career involving technology? A. Excited, it strongly appeals to me B. Open to it, depending on the role C. Not sure yet D. It's not really something I'm drawn to

17. Engineering Interest

341. How do you feel about building or designing things? A. I love it, I enjoy creating things from scratch B. I enjoy it occasionally C. I like the idea more than doing it myself D. It's not something I'm drawn to
342. When something breaks around the house, you're curious about: A. How it works and how to fix it B. Whether it can still be used C. Who will fix it D. Getting a new one
343. Which of these projects would excite you most? A. Designing a bridge or building model B. Building a small machine or device C. Creating a working prototype for a school fair D. None of these particularly
344. How interested are you in how big structures, like bridges or skyscrapers, are built? A. Very interested B. Somewhat interested C. Curious occasionally D. Not particularly interested
345. If your school had an engineering or design club, would you consider joining? A. Yes, definitely B. Maybe, depending on the projects C. Only if friends were involved D. Probably not
346. How do you feel about subjects like physics and technical drawing? A. I enjoy them a lot B. I find them interesting C. They're okay, not my favourite D. I don't enjoy them much
347. Which activity sounds most fun to you? A. Designing and building a model car or bridge B. Taking apart a machine to see how it works C. Solving physics-based puzzles D. None of these particularly
348. How do you feel about a career that involves designing or building things, like machines, buildings, or systems? A. Very appealing B. Somewhat appealing C. Not sure yet D. Not particularly appealing

349. When you see well-designed technology or structures, you usually: A. Wonder how it was engineered B. Appreciate it without thinking too much about the process C. Notice if it looks good D. Don't think much about it
350. How comfortable are you working with tools, like a screwdriver or a wrench? A. Very comfortable, I enjoy hands-on work B. Fairly comfortable C. Not very experienced, but willing to learn D. I prefer not to work with tools
351. Which type of engineering sounds most interesting to you? A. Mechanical (machines and motion) B. Civil (buildings and infrastructure) C. Electrical or electronics D. None of these particularly
352. How do you feel about maths-heavy problem solving? A. I enjoy the challenge B. I'm okay with it C. I find it difficult but manageable D. I try to avoid it
353. If given a school project to design something useful for your community, you would enjoy: A. Designing and building a working prototype B. Sketching out the design ideas C. Researching what's needed D. Helping in another way, like presenting it
354. How interested are you in renewable energy technology, like solar panels or wind turbines? A. Very interested in how they're designed B. Interested in general C. Somewhat aware of them D. Not particularly interested
355. Which best describes your interest in engineering as a career path? A. Strongly interested B. Fairly interested C. Undecided D. Not particularly interested

18. Medical and Health Interest

356. How do you feel about learning how the human body works? A. Very interested, I find it fascinating B. Interested, especially in certain topics C. Somewhat curious D. Not particularly interested
357. If you saw someone get hurt, your instinct would be to: A. Try to help and figure out what to do B. Comfort them while getting help C. Call for an adult or professional help D. Feel unsure of what to do
358. How interested are you in topics like nutrition and how food affects the body? A. Very interested B. Somewhat interested C. Curious occasionally D. Not particularly interested
359. Would you enjoy volunteering at a hospital or clinic? A. Yes, definitely B. Maybe, I'd consider it C. Only if a friend joined D. Not really my interest
360. How do you feel about subjects like Biology and Chemistry? A. I enjoy them a lot B. I find them interesting C. They're okay, not my favourite D. I don't enjoy them much
361. If a family member is unwell, you're usually the one who: A. Wants to understand what's wrong and how to help B. Comforts them and keeps them company C. Helps with practical things, like getting medicine D. Feels concerned but isn't sure how to help
362. Which health-related career sounds most appealing to you? A. Doctor or surgeon B. Nurse or physiotherapist C. Public health or nutrition specialist D. None of these appeal to me strongly

363. How interested are you in how diseases spread and how the body fights them? A. Very interested B. Somewhat interested C. Curious occasionally D. Not particularly interested
364. If your school had a health or first-aid club, would you join? A. Yes, definitely B. Maybe, depending on the activities C. Only if friends were involved D. Probably not
365. How do you feel about the idea of caring for sick or injured people as a job? A. It strongly appeals to me B. It's somewhat appealing C. I'm not sure yet D. It's not something I'm drawn to
366. When you learn a new health fact, like how sleep affects the brain, you usually: A. Want to learn more about it B. Find it interesting to know C. Remember it, but don't dig deeper D. Don't think much about it afterward
367. How comfortable are you with topics like blood, injuries, or medical procedures? A. Very comfortable, they don't bother me B. Fairly comfortable C. A little uneasy, but manageable D. Quite uncomfortable
368. Which activity would you find most rewarding? A. Learning to perform basic first aid B. Supporting someone through an illness C. Researching a cure or treatment D. None of these particularly
369. How interested are you in mental health and emotional wellbeing? A. Very interested, I'd like to understand it deeply B. Interested in general C. Somewhat aware of its importance D. Not something I've thought much about
370. Which best describes your interest in a healthcare-related career? A. Strongly interested B. Fairly interested C. Undecided D. Not particularly interested

19. Environmental Interest

371. How do you feel about issues like climate change and pollution? A. Very concerned, I want to understand and help solve them B. Concerned, I try to stay informed C. Aware of them, but not deeply involved D. Not something I think about often
372. If your school started a recycling or environmental club, would you join? A. Yes, definitely B. Maybe, depending on the activities C. Only if friends were involved D. Probably not
373. How interested are you in learning about animals, plants, and ecosystems? A. Very interested B. Somewhat interested C. Curious occasionally D. Not particularly interested
374. Which activity would you enjoy most? A. Studying how ecosystems work B. Volunteering for a clean-up or tree-planting event C. Learning about renewable energy solutions D. None of these particularly
375. How do you feel about subjects like Geography and Environmental Science? A. I enjoy them a lot B. I find them interesting C. They're okay, not my favourite D. I don't enjoy them much

376. When you see litter or pollution in your surroundings, you usually: A. Feel motivated to do something about it B. Feel bothered, but unsure what to do C. Notice it but move on D. Don't pay much attention to it
377. How interested are you in careers focused on protecting the environment? A. Strongly interested B. Fairly interested C. Undecided D. Not particularly interested
378. Which topic would you enjoy researching for a school project? A. How to reduce plastic waste B. How climate change affects different regions C. How renewable energy works D. None of these particularly
379. How do you feel about spending time outdoors, exploring nature? A. I love it, and I like understanding what I see B. I enjoy it sometimes C. I like it, but I don't think much about the science D. I'm not particularly drawn to it
380. If you could help solve one environmental problem, which would you choose? A. Deforestation B. Ocean and plastic pollution C. Climate change and clean energy D. I'm not sure
381. How interested are you in sustainable farming or food production? A. Very interested B. Somewhat interested C. Curious occasionally D. Not particularly interested
382. Would you enjoy a career that involves studying or protecting wildlife? A. Yes, definitely B. Maybe, I'd consider it C. Only with more exposure to it D. Not really my interest
383. How do you feel about learning how human activity affects the planet? A. Very interested, I want to understand it deeply B. Interested in general C. Somewhat aware of it D. Not something I've thought much about
384. Which best describes your interest in environmental issues? A. I actively try to learn and do something about them B. I care and try to stay informed C. I'm aware, but not very involved D. I don't think about them much
385. If you had to choose a cause to support at school, would you pick something environmental? A. Yes, definitely B. Maybe, among other options C. Only if it were popular among friends D. Probably not my first choice

20. Research Interest

386. How do you feel about digging deep into a topic to understand it fully? A. I love it, I could spend hours researching something B. I enjoy it when the topic interests me C. I do it when required for schoolwork D. I prefer quick answers over deep research
387. When given an open-ended school project, you usually: A. Get excited to explore the topic thoroughly B. Research enough to do well C. Do the minimum research needed D. Prefer projects with clear guidelines instead
388. How do you feel about reading scientific articles or academic papers? A. I enjoy trying to understand them B. I find them interesting but sometimes hard to follow C. I read them only when required D. I find them difficult and avoid them

389. If you found conflicting information about a topic, you would: A. Investigate further to find the most accurate answer B. Look for a trusted source to clarify C. Ask someone knowledgeable D. Go with whichever source seems most convenient
390. How interested are you in asking questions that don't have easy answers? A. Very interested, I enjoy exploring them B. Interested, depending on the topic C. Somewhat curious D. I prefer questions with clear answers
391. Which activity would you enjoy most? A. Conducting a small experiment or survey B. Writing a detailed research report C. Investigating an unsolved question or mystery D. None of these particularly
392. How do you feel about spending time in a library or online researching a topic that interests you? A. I really enjoy it B. I enjoy it sometimes C. I do it mainly for assignments D. I don't enjoy it much
393. If you discovered something new or interesting while researching, you would: A. Want to explore it further immediately B. Note it down to look into later C. Share it with a friend or teacher D. Move on to finish the task at hand
394. How comfortable are you with uncertainty when researching a topic? A. Very comfortable, I enjoy exploring the unknown B. Fairly comfortable C. A little uneasy, I prefer more certainty D. I prefer well-established facts and answers
395. Which best describes how you approach a research project? A. Thorough and detail-oriented B. Curious and exploratory C. Practical, doing what's needed to complete it D. I prefer working from existing information rather than deep research
396. How interested are you in the process of scientific discovery, like how vaccines or new technologies are developed? A. Very interested B. Somewhat interested C. Curious occasionally D. Not particularly interested
397. If you had a chance to assist in a real research project, would you take it? A. Yes, definitely B. Maybe, if it interested me C. Only with guidance and support D. Probably not
398. How do you feel about collecting and analysing data, like results from a survey? A. I enjoy it, I like finding patterns B. I find it interesting C. I can do it, but it's not my favourite D. I find it tedious
399. Which best describes your curiosity about unanswered questions in the world? A. I actively want to help find answers B. I find them fascinating to think about C. I'm curious when I come across them D. I don't think about them much
400. How interested are you in pursuing a career that involves research? A. Strongly interested B. Fairly interested C. Undecided D. Not particularly interested

End of question bank — 404 unique questions across 20 categories, each designed to help Atlas quietly get to know a student's natural strengths, interests, and way of thinking.
